

Shading.

Use coloured pencils or wax crayons, not felt tip pens.

1. Outline a balloon.
2. Colour all over very lightly and evenly.
3. Colour over again, leaving a small area in the middle. Try to make the part where the two levels of shading meet blend gradually without an obvious line.
4. Colour over again leaving a larger area. Try to make the part where the two levels of shading meet blend gradually without an obvious line.
5. Colour again firmly, leaving a larger area.

Tip:- rubbing over with the finger will help to smooth and blend the colour.

This technique can be applied to many colouring situations.
