

How to colour leaves.

Shade your leaves in the following way. First outline the leaves and go over the veins. Next lightly shade the whole leaf. Now shade over again working from the edge or the veins but not covering the whole leaf. If you have good quality pencils, you can blend the work with your finger by rubbing. Do this carefully so that you do not rub the colour over the edge of the leaf. You can colour the letters in the same way and they will look quite solid. You can practice on the large leaf above before doing the whole branch on the text below. I have coloured these leaves in red because I think they look like Virginia Creeper.

Peace
I leave with you,
My peace
I give unto you.
